

Says

What have we heard them say?  
What can we imagine them saying?

Thinks

What are their wants, needs, hopes, and dreams?  
What other thoughts might influence their behavior?

NETWORK ENGINEER

Air transport network is used by million of people every day

It plays key role in the spread of some infections

The worldwide air transportation network is a critical infrastructure

Air transport networks can be defined worldwide as well as for one region or for one airline company

The scale of the network can be global or domestic

Air transport network models are also tool to investigate system robustness

Air transport systems of a country of a country's own air transport company

Quality of the airports and national airlines are also the measures of the state of development of the country

The worldwide air transport network defines communities

Modeling air transport networks aims airline companies to organize their routes in a cost-efficient way and therefore maximize their profits

An alternative application modeling human disease networks

They help to weaknesses of the system in case of various kinds of disruptions

Does

What behavior have we observed?  
What can we imagine them doing?

Feels

What are their fears, frustrations, and anxieties?  
What other feelings might influence their behavior?
